Hard Copy™ passes the test!

[San Jose, CA, October 25, 2005]-- Better Idea Group (BIG) announced today that **Hard Copy™**, their first product in the BIG-add-ins line of products, has passed Microsoft Small Business Accounting testing at QualityLogic Inc.

Areas addressed during testing:

- Integration and compatibility with the Microsoft Office Small Business Accounting system
- Security and access control to Microsoft Office Small Business Accounting data
- Application install/uninstall processes
- Basic functionality and error handling

What does passing the test signify?

- The product is fully functional with the Microsoft Office Small Business Accounting system
- The product is designed to take advantage of the system's unique benefits
- The product incorporates data security protection

“Congratulations!” said Ken Strobel project manager at QualityLogic Inc, “We have tested your software product, assigned the Unique Product Identifier Be2005100472281967, in accordance with the requirements set out by the Microsoft Office Small Business Accounting Application Testing Program and found that your application meets all of the requirements established for this program.”

Built as an add-on product for Microsoft's Small Business Accounting, Hard Copy is an easy to use utility that creates a printed version of selected transactions in Small Business Accounting so that your accounts payable files have a professional, consistent look. “Better Idea Group is committed to providing quality products to the Small Business Accounting marketplace, this certification ensures our customers our application is safe to use with Small Business Accounting” said Ernest Cook, principal of Better Idea Group.

Hard copy is available for purchase immediately at:
